PROFESSIONAL SUMMARY

Senior Backend Engineer who owns systems end to end — India's largest automotive marketplace (CarDekho/GirnarSoft), a Fortune 500 data center company (Equinix), SaaS ownership at Rampwin, and self-hosted infrastructure I run myself (Kaizex, Session Logger — see Projects). 4+ years in production, primarily Java (Spring Boot) and Node.js.

CORE COMPETENCIES

Distributed Systems & Microservices

Event-Driven Architecture (Kafka)

SLO Design & On-Call Reliability

CI/CD & Canary Deployments

Java (Spring Boot) & Node.js

Full-stack (React/Next.js)

WORK EXPERIENCE

Equinix Jun 2025 – Present

Senior Software Engineer

Fortune 500 data center & interconnection company — full-time since Jan 2026 (contracted via Husys Consulting, Jun–Dec 2025)

- Reduced p99 query latency **40%** and report generation time **55%** by rewriting the MySQL data-access layer with optimized schema design, targeted indexing, and query execution plan tuning
- Cut deployment incidents **30%** by authoring GitHub Actions canary CI/CD pipelines with automated rollback, and deployed SLO alerting + runbooks across two service domains under a 1:8 on-call rotation

Rampwin Technologies Nov 2024 – May 2025

Senior Software Engineer

Early-stage hospitality SaaS — real-time booking and operations platform

- Cut system downtime **40%** and MTTR **28%** by leading a monolith-to-microservices migration — strangler-fig decomposition decoupling booking, payment, and notification domains onto Kafka with at-least-once delivery guarantees
- Mentored junior engineers via code review, reducing production bugs **15%**

GirnarSoft (CarDekho Group) Jan 2022 – Nov 2024

Software Engineer

India's largest automotive marketplace — millions of daily users

- Cut median API latency **35%** and lifted user conversion **12%** by refactoring Java (Spring Boot) + Node.js execution paths and Elasticsearch query pipelines serving millions of daily requests

PROJECTS

Personal Infrastructure Projects

Kaizex — multi-tenant social content-automation platform (Spring Boot + Next.js); AI pipeline over RabbitMQ, Redis-backed scheduling, self-hosted SSO/OAuth2 verified end-to-end; product layer in active development.

Session Logger — full-stack session tracking & billing app, one-click start/stop.

Java (Spring Boot), Redis, RabbitMQ, OAuth2/OIDC, React/Next.js, Node.js, PostgreSQL · buildwithkulshresth.com

EDUCATION

B.Tech, Computer Science — Rajasthan Technical University 2022

SKILLS

Skills: Java (Spring Boot), Node.js, TypeScript, REST, GraphQL, gRPC, MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch, Kubernetes, Docker, Helm, AWS, GitHub Actions, Jenkins, Prometheus, Grafana, ELK, JUnit, Jest
